

Where does all our rubbish go?

Bronwyn Livingstone

Where does all our rubbish go?

Every boy and girl should know

Our bin men take it all away

“What happens to it then?” we say

It once was dumped and caused pollution

But now we’ve found a new solution

They put it in a huge machine

And out it comes purified and clean

A lot of the toys you use to play
Are made from rubbish thrown away
It's also used to create power
To light up all our homes per hour

And so our rubbish now today
Is used in this recycled way
One step closer you may say
To saving our planet day by day
