

# DEVELOPMENT DAYS

## SHAPING EDUCATION, UNLOCKING POTENTIAL

As learning leaders, career-long professional development for educational professionals is central to creating and maintaining a world-class education system. As a College, Stranmillis is committed to delivering high quality, practitioner-focused educational research and scholarship and we have built a strong reputation internationally for shaping innovative educational practice and helping unlock the potential of children and young people.

At the heart of our career-long learning strategy is a focus on ensuring that our research has an impact not only on teaching and education practitioners, but beyond academia in delivering economic, social and cultural benefits. The College continues to pioneer imaginative, creative and engaging initiatives and projects across a broad range of pedagogy and subject areas, in our areas of specialism and emerging multi-disciplinary fields that reflect the recognised needs of our society.

# DEVELOPMENT DAYS

## DEVELOPMENT DAY PROGRAMME

Our Development Day model provides schools and learning communities with the building blocks to create a highly flexible approach to professional development. You choose the core themes that address your specific different developmental needs. Alternatively, talk to our CPD team who can help develop a bespoke programme around your specific school or learning partnership.
